

BRAND IDENTITY BOOK · FIRST INSTITUTIONAL PASS

Alesvia

Human autonomy is the baseline. An identity system for a modern public-interest institution — symbol, wordmark, color, typography, and usage.

ALESVIA · VZNIKÁ JAKO ZAPSANÝ ÚSTAV (Z.Ú.), REGISTRACE PROBÍHÁ · 2026

Who Alesvia is

Alesvia je vznikající český institut pro psychologickou stránku umělé inteligence — vzdělává veřejnost, školí organizace podle AI Actu a připravuje terapeuty na nová klinická témata.

Alesvia is an emerging Czech institute for the psychological side of artificial intelligence — educating the public, training organizations under the EU AI Act, and preparing therapists for new clinical topics.

Positioning

Alesvia must look like a **modern public-interest institution** — not a startup product and not a generic nonprofit template. The identity communicates institutional seriousness, clarity, composure, intellectual depth, and human-centered governance.

The four pillars

Unplugged AKTIVNÍ / ACTIVE

Healthy boundaries with conversational AI — clearly and without moralizing. AI is a tool, not a relationship.

Akademie / Academy V PŘÍPRAVĚ / IN PREPARATION

AI literacy and humanly sustainable AI deployment for companies, schools, and public administration (incl. Article 4 of the EU AI Act). Revenue funds public-benefit programs.

Praktici / Practitioners V PŘÍPRAVĚ / IN PREPARATION

Training psychologists, psychiatrists, and therapists for the AI era.

Policy Lab V PŘÍPRAVĚ / IN PREPARATION

Research and advocacy translating ethical frameworks into legislative and corporate guidelines.

Truthful language rule. Alesvia is being established as a registered institute (z.ú.); registration is in progress. Public materials must never claim completed registration, a trademark, or running services before they exist — use "vzniká", "v přípravě", "registrace probíhá".

The architectural A

The mark is an **architectural A** that also reads as a threshold or portal. The outer form is the institution; the inner gold path is autonomy — a centerline of agency inside a larger system. It is deliberately not a shield, chat bubble, spark, brain, or circuit.

PRIMARY SYMBOL — LIGHT BACKGROUNDS

REVERSE SYMBOL — DARK BACKGROUNDS

HORIZONTAL LOCKUP — THE PREFERRED FORMAL TREATMENT

Wordmark & lockup rules

- The wordmark is **Alesvia** in a refined serif — no tagline inside the logo, no period.
- Horizontal lockup for navbars, deck covers, one-pagers, partner documents.
- Stacked lockup for ceremonial, centered use: PDF title pages, interstitials, profile headers.
- Symbol alone for favicons, avatars, and compact placements; wordmark alone only in wide layouts where the symbol is established nearby.

Primary palette

Primary Ink
#16324F — wordmark, headings, institutional surfaces

Accent Gold
#C79B3B — the autonomy path, selected emphasis

Paper
#F4F1EA — light backgrounds, icon tiles

Supporting neutrals

Text Charcoal
#221E22 — body copy

Muted Neutral
#857E8B — metadata, secondary text

Aubergine Support
#31263E — deep supporting surfaces

Secondary accents — use sparingly

Civic Teal
#2A7F78 — systems, diagrams, publication covers

Pale Civic Mist
#DCE7E2 — cover fields, quiet panels

Policy Clay
#A74E3A — warnings, tensions, regulatory emphasis

- Teal and mist belong to diagrams and research covers, never inside the primary logo.
- Reserve clay for warnings and regulatory emphasis only.
- Never replace the gold centerline with gradients or arbitrary colors.

04 · TYPOGRAPHY

Institution and utility

Typography splits into two clear roles: **serif** for identity, major statements, and thesis-led emphasis; **sans-serif** for interface copy, navigation, metadata, and body structure. The current pairing is **Playfair Display** + **Inter**.

SERIF · PLAYFAIR DISPLAY — IDENTITY & STATEMENTS

Human autonomy is the baseline. Lidská autonomie je základ.

SANS-SERIF · INTER — INTERFACE & BODY

Alesvia builds research, policy, education, and practical frameworks that help people and institutions stay in control as AI becomes part of daily life. AaBbCcDdEeFfGg 0123456789 — áčďéěíňóřšťúůýž

Typographic character

The brand should feel:

- editorial
- composed
- confident

It should not feel:

- startup-minimal
- overly ornamental
- luxury-brand theatrical

> In raw SVG and environments without web fonts, fall back to Georgia / Times New Roman (serif) and Inter / Arial (sans), as the repository templates do.

How to use the mark

Preferred uses

- Horizontal lockup for formal brand appearances.
- Symbol alone for favicon, app icon, avatar, small UI.
- On light backgrounds: ink outer form, gold centerline.
- On dark backgrounds: reverse symbol or lockup; place the standard symbol on a paper tile when contrast is weak.
- At small sizes use the symbol only; at medium and large sizes prefer the full lockup.

What to avoid

- Do not stretch the symbol vertically or horizontally.
- Do not recolor the symbol arbitrarily.
- Do not replace the gold centerline with gradients or rainbow accents.
- Do not drop the symbol into busy atmospheric gradients without contrast.
- Do not use the mark as a decorative pattern until the identity matures.

Language & legal guardrails

- Never present the mark or name as a registered trademark before clearance and registration are complete.
- Never state that Alesvia is a registered institute — say "vzniká jako zapsaný ústav (z.ú.); registrace probíhá."
- Retired sub-brand names (Mind, Proof, Compass, Watch, Advisory, Education) must not appear as standalone initiatives; their themes live inside the four pillars.
- Before public launch at scale, follow the trademark clearance process in *docs/brand-management.md*.

Where the identity lives

All brand source files are versioned in this repository under **public/brand/** — the single source of truth for approved assets.

Logo assets

- alesvia-symbol.svg / -reverse / -tile
- alesvia-wordmark.svg
- alesvia-lockup-horizontal.svg / -reverse
- alesvia-lockup-stacked.svg / -reverse
- alesvia-social-avatar.svg

Templates & web

- templates/deck-cover-general.svg
- templates/deck-cover-institutional.svg
- templates/research-cover.svg
- Web: BrandMark.tsx, icon.tsx, apple-icon.tsx, opengraph-image.tsx

Current applications

- Favicon, app icon, Open Graph branding, navbar and footer treatments on alesvia.org.
- Partner deck covers and research publication covers (see docs/partner-deck-visual-spec.md and docs/research-cover-system.md).

Next identity steps

- Section divider templates for decks; per-pillar cover variants.
- Research cover variants by format: briefing, report, essay.
- Stronger typographic rules for PDF and slide materials.

> The identity is working if Alesvia feels like a serious institution, a human-centered standard setter, and a calm but opinionated public-interest actor. If it starts to feel like a startup, a consultancy, or an NGO template — correct it.
